

FPG Technologies & Solutions Limited wins three awards from 2019 NIGERIA Technology Awards (NiTA) Lagos.

FPG Technologies and Solutions Limited (a member of FlexiP Group) is an IT Systems Integrator Company that provides innovative and secure IT solutions that help customers drive extreme business agility with confidence. FPG announced that it was recently received three awards from the 2019 NIGERIA Technology Awards (NiTA).

NIGERIA Technology Awards (NiTA) is an annual event organized to celebrate and reward Technology Entrepreneurs, Technology Professionals, Corporate Organizations, Innovators, Academicians, Inventors and Policy Makers (Government) in Nigeria. The prestigious annual award recognizes outstanding technology companies and individuals in Nigeria who have made contributions during the past year, as well as to the technology industry overall.

FPG Technologies & Solutions Limited won in three categories; Tech Consulting Company of the Year 2019, Excellence in Cloud & Infrastructure Deployment 2019. Also, FPG's CEO Rex Mafiana won Most Enterprising Tech Company CEO of The Year 2019.

The NiTA awards serves to reiterate FPG'S commitment for deploying innovative IT technology, developing strong partnerships with OEM's, impacting business results through a consumer-centric focus and embracing technology as a mission-critical business enabler.

Rex Mafiana, FPG's CEO is a technology advocate and recognized for his outstanding leadership in accelerating IT adoption in Nigeria. His unique level of understanding technology, how technology can change lives and businesses and his commitment to leadership has not only built the company to what it has become today but helped shape the Nigerian IT industry.

What does it mean to you to be named Most Enterprising Tech Company CEO of The Year 2019? *I am humbled by this award and remain grateful to the organizers and our customers who keep trusting us to partner with them in their endeavours and journey towards building true digital enterprises that ensure agility with confidence!*

What is Nigeria's adoption rate for IT Cloud, Infrastructure and Security services? *We see significant and growing adoption rates for all things cloud and Cyber Security, these are areas we have key strengths and will continue to support our customers.*

What's driving FPG's growth right now? What opportunities are you seeing ahead of you? *We see opportunities in digital transformation initiatives that many of our customers are currently exploring as well as growth in the Cyber Security space. These represent significant opportunities for us and our customers.*

What are some challenges facing IT in Nigeria and how can these be mitigated? *Clearly, the major issues lie in the macro economy that affects the entire country*

What are some ways that Lagos can improve as a technology hub? *Lagos state can explore public-private partnerships and give incentives to private sector participants who are already doing a lot in this regard. There multiple hubs, including the FPG innovation hub currently operating in the state.*

What IT trends should we be watching out for in 2020? *A lot will be happening in 2020 and in the near term, the scope is wide but we can see more sophisticated cyber-attacks, continued adoption of cloud and mobile (agile technologies) as more and more organizations embrace digital transformation and agile approaches to technology in business.*

What is the FPG culture and how do you attract new and younger talent? *FPG culture as underpinned by our core values of leadership, flexibility, Integrity, Go-beyond, simplicity and synergy is one that encourages young people who we help to develop into leaders by having a conscious program of development and personal ownership. Our culture of flexibility and simplicity ensure that our work environment is open, friendly and engaging. Our humanistic management approach ensures that young people are happy working at FPG.*
